

## Campus Chemistry Recruiting

### Informational Session and Interviews

## University of Wisconsin-Madison

### AbbVie Chemistry On-Campus Visit

**9 A.M. on July 13, 2023, in Room 9341**

AbbVie is looking for talented scientists to join our discovery and process chemistry groups. Join AbbVie representatives at an informational session on the science currently being performed at AbbVie. We encourage all chemistry graduate students and postdoctoral researchers who are interested in learning more to attend. We look forward to interviewing candidates with backgrounds involving organic chemistry.

For senior graduate students and postdoctoral researchers interested in meeting individually with AbbVie representatives, please send your CV and research summary (combined as a single PDF) to Handshake by July 9th. If further clarity on the expectations for these documents would be helpful, please forward any questions to Erin Grunewald.

We are excited to be meeting with the students in-person this coming year, and we look forward to discussing the exciting research currently happening at Madison and at AbbVie.

A close-up photograph showing a person's hands in blue nitrile gloves. They are pouring a yellowish liquid from a glass flask into a glass beaker. The background is blurred.

### Informational Session

**July 13, 2023,  
9 a.m. in Room 9341**

Light refreshments will be provided.
