

We are excited to announce this year's Merck--UW Madison info session and campus recruiting event. Merck scientists will be holding a seminar to share scientific accomplishments and career opportunities within Merck Research Laboratories (MRL). This is an excellent opportunity for graduate students and postdocs in STEM fields who are interested in starting a pharmaceutical industry career.

During the seminar with Merck scientists, you will learn about what we do, meet with the recruiting team, form relationships, and understand how you can fit into the diverse career paths at Merck. Students will also be able to engage with Merck scientists and ask questions about what it is like to work in a pharmaceutical research and development organization.

Additionally, for 4<sup>th</sup> year and above graduate students, we offer on campus interview opportunities for qualified candidates. For younger graduate students who are interested in available career opportunities, they can learn about Summer Internships, Co-Ops, and Post Doc opportunities and much more! We cannot wait to meet you at our information session!

Join us this July 17<sup>th</sup> from 4:00 – 5:30 PM at Chem 1435 for an informational session, light appetizers will be provided for attendees. Interviews will be scheduled on July 18<sup>th</sup>.  
We look forward to meeting you!
